TO: Mellotron Owners

FROM: Bill Eberline, President

NEW MELLOTRON 4 TRACK AND CONVERSION

We are pleased to announce the new Mellotron 4 Track. The following information is being sent to Mellotron owners only, before the advertising begins.

Enclosed is a layout of what the new Mellotron 4 Track Control Panel will look like. The Mellotron 4 Track includes: four pre amps, each with 3 band E.Q. (no compromising from track to track), a pan pot to assign its position, volume control, on/off channel switch with an L.E.D. to show which track is on. All tracks or any combination of tracks can be used at the same time.

Thirty-five 4 Channel, 4 Track $\frac{1}{4}$ " Heads are used so that you can put your own instruments or voices on standard $\frac{1}{4}$ " 4 Track Tape Recorders. This special headblock has a new guide system to reduce tape wear.

The Mellotron 4 Track is driven by our SMS3 Servo Motor System with a $\pm 20\%$ variation for transposing and a power supply that has been condensed to eliminate weight, and variable A.C. voltage selection for around the world use. All of this is hooked to seven outputs: four direct, left and right, and a full output, for monitors or directly to your P.A. (great for studio or demo work).

A new Tape Library has been started with new sounds recorded in the U.S.A. A continual program for new sounds has been designed for 1981 and 1982.

A new capstan is an available option! To see if you need it on your Mellotron, do the following: Remove lid, keyboard and tapes. Run your fingers along the length of the capstan while it is running. If it feels wavy or grooved, you need a new capstan.

The new Mellotron 4 Track Conversion is designed to fit any Mellotron 400 Series from Serial Number 101 and up (the 400 Series was first introduced in 1972). Whether you are considering a new Mellotron 4 Track or a Mellotron 4 Track Conversion, production is limited and it's on a first-come basis.

NEWS RELEASE

WHAT'S NEW WITH MELLOTRON?

A NEW OWNER -

MELLOTRON is now a Division of Bomar Fabricators, Inc. and has a new President, Bob Kinney.

A NEW LOCATION -

1100 Main Street, Southbury, Connecticut 06488
Telephone (203) 264-1651

A NEW TRON -

The work has been completed on the new 4TRACK MELLOTRON. The New Electronics are now housed in an All New Aluminum Cabinet, which is lighter and more road worthy than any MELLOTRON ever produced.

THE NEW FACTORY -

Bomar is set up with the latest "CNC" Equipment (Computer Control) to make the manufacturing of the MELLOTRON Metal Parts as up-to-date as the New Electronics.

DELIVERY -

The totally new MELLOTRON 4TRACK is made to order and can be delivered in four to six weeks, with a choice of Blue, White or Black Cabinetry.

IN STOCK -

We also have accessories and kits for up-grading 3TRACK MELLOTRONS, price list on request.

We're looking forward to hearing from you.

Sincerely,

Everyone at the new **MELLOTRON USA LTD.**
