

The Exciting  *Chamberlin* Makes possible an entirely
NEW world of entertainment

The new model 800 Chamberlin is the most thrilling of all keyboard instruments to play.

It combines in one unit the mighty and beautiful sounds of a true pipe organ with pipe organ bass or 12 instrumental rhythms including Waltzes, Fox Trots, Rhumbas, Cha-Cha, and many other latin and standard rhythms. With a flick of the finger you change from rhythms to organ, string or tuba bass. 25 bass foot pedals enable you to play in any key or at any tempo you desire.

The musical combinations are fantastic and run into the thousands. For example: One organ stop can be played with many beautiful instruments including vibraharp, chimes, bells, guitar, bird songs, piano, trombones, violins and even with beautiful female and male human voices, either solo or choir. The human voices will sing any song you desire to hear.

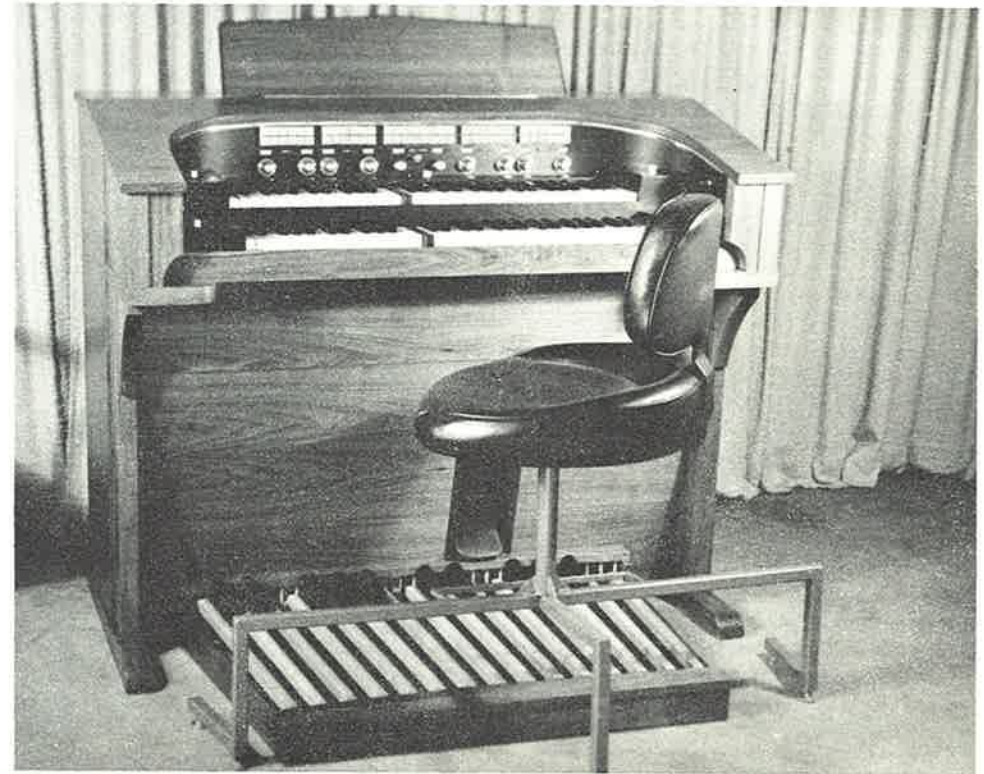

The fabulous Chamberlin is designed to truly create almost any musical and sound atmosphere you desire; Classical, Church, Western, Southern, Hawaiian, Rock and Roll and many others.

Using the 48 sound effects along with your music such as rain, thunder, old steam locomotives, steamboats, frogs, crickets, farm animals, coyotes, birds, and many others, you create the atmosphere of being there.

By using the special effects, Hawaiian steel guitars can be played in a straight tone or with beautiful slurs. Trombones can be played straight or with slurs or with wa-wa. Banjos can be played with single pick chords or with tremolo, and all with authentic Hi Fidelity true instrument sound. The most thrilling sounds you can imagine are yours with the Chamberlin.

The musical and sound combinations are seemingly endless, they run into the thousands. Each change is a new adventure into your new world of music and so simple to play. One finger on a rhythm key will start a group of instruments playing a chord in rhythm. Bass fiddle, piano, guitar, drums and Latin instruments beat out a perfect chord rhythm for you. With one finger of your right hand you play a melody with the rhythm section, any tune, as long as you desire, merely by moving from one rhythm chord to another.

Combining the magic of electronics with a vast mechanical know-how in high fidelity musical and sound reproductions, this unique instrument offers a new concept in music and sound effects that is paralleled by no other instrument. Complete solid state and computerized instant selector system.
