

# THE BLACK & WHITE C

The concept of playing acoustic or 'sampled' sounds on a keyboard, first introduced by Fairlight with the CMI in 1979, has now become a requirement of today's synthesiser users.

Syco, the specialists in 'sampling' keyboards, have selected the 'state of the art' instruments, instruments which meet the varying demands of our clientele.

The choice of the best sampling keyboards, The Fairlight CMI, the Emulator II and the Kurzweil 250. The Black and White Collection.

Fairlight CMI is much more than a musical instrument. It is an integrated music production system, expandable to cope with the ever-changing needs of today's musician. Consistently upgraded since its introduction in 1979, the CMI has become legendary for its compositional software. Now the largest selling computer musical instrument in the UK, the options arriving in the next six months will increase its already fantastic potential tenfold.

EII, successor to the popular Emulator, brings the power of high quality sampling within the reach of most professional musicians. Featuring a five octave dynamic keyboard with a variety of possible keyboard modes, the inclusion of filters, VCAs, envelope generators and independent LFOs allows you to extensively modify any sampled sound. An eight track sequencer with MIDI and SMPTE interfaces enables complex compositions to be recorded. These features, together with a dramatically increased sampling memory make the EII a powerful creative tool.

Kurzweil 250 features an 88 note piano-type keyboard. Utilising technology from the fields of artificial intelligence and pattern recognition it achieves extraordinary realism of sound with unprecedented expressive capabilities. It's supplied with thirty preset sounds, (expandable to 60), can accommodate up to 40 keyboards set-ups, and features a twelve track sequencer. Ideally suited to live performance and studio work, the Kurzweil 250 is the only viable alternative to an acoustic grand piano.

All of these instruments are available for you to see and hear at our demonstration suite in W2. So next time your looking for something very special, try the best sampling keyboards.

The Black and White Collection.
